

# AP/DC Learning Preference form

Data gathering for our joint best practices presentation.

Your username ([dperrel@acsc.net](mailto:dperrel@acsc.net)) will be recorded when you submit this form. Not you? [Sign out](#)

Which Class are you enrolled in

- Dual Credit/ Ivy Tech Biology
- AP/ Dual Credit Physics

Over the course of the year you were instructed in two different methods; at the start of the year in a more typical standard lecture format, with labs and assignments, then later in the year we changed to the "Jedi Academy." Please rate your preference on the scale below for one or the other method of learning.

	0	1	2	3	4	5	
standard classroom	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Jedi Academy

In the question above you were asked to rate your preference. In the space below we are asking you to explain why you chose the rating you did.

Your answer

---

Send me a copy of my responses.

I enjoy learning using electronic resources. It also made me feel as if I was able to learn more at my own pace.

I preferred the Jedi Academy a bit more than the standard classroom format because I would be able to access all the physics notes and work anywhere easily at any time. Though I do like there to be some lectures here and there to help explain what we are learning about.

I prefer the standard classroom method of learning. I learn better that way because there is more time in the classroom to learn things and ask questions about the teacher's lesson. In the other method, however, we are supposed to learn more on our own at home, which makes it more difficult.
