### All Teachers Need AIR

Assessment is a complex topic encompassing many interdependent disciplines in the learning sciences. Now, more than ever, teachers and schools need opportunities and resources to strengthen assessment practices in all classrooms. AIR is a new Professional Learning Network designed to empower teachers to share and create assessment resources and implement assessment best practices in their own classrooms. **Our mission** is to strengthen classroom assessment practices.

### What We Do

- Connect pre- and in-service teachers in a Professional Learning Network (PLN).
- Curate and create online resources for assessment, including: Training videos, technology reviews, assessment instruments, learning analytics, and more.
- Facilitate innovative assessment services with schools and teachers, including workshops and apprenticeships.
- Incubate research that advances practice and promotes the profession.

Join Us!

**All future and in-service teachers are welcome!**
